DOCUMENT CAMERA
ELMO LX-1

The LX-1 is the newest addition to ELMO's L-Series line-up. The LX-1 Document Camera was designed with not only the user in mind but the audience as well. With its new sleek and thin design, it allows for better eye contact with your audience without blocking their view of you and the display. A built-in Wi-Fi connection source allows for wireless control of the camera from your Windows based device. It was also built with a 45% smaller footprint in order to save room and increase portability, simplified connection sources containing output options only for ease of use, and a built-in security plate to keep your LX-1 safe and secure. Last but not least you will still get the amazing L-Series quality at an affordable price.
